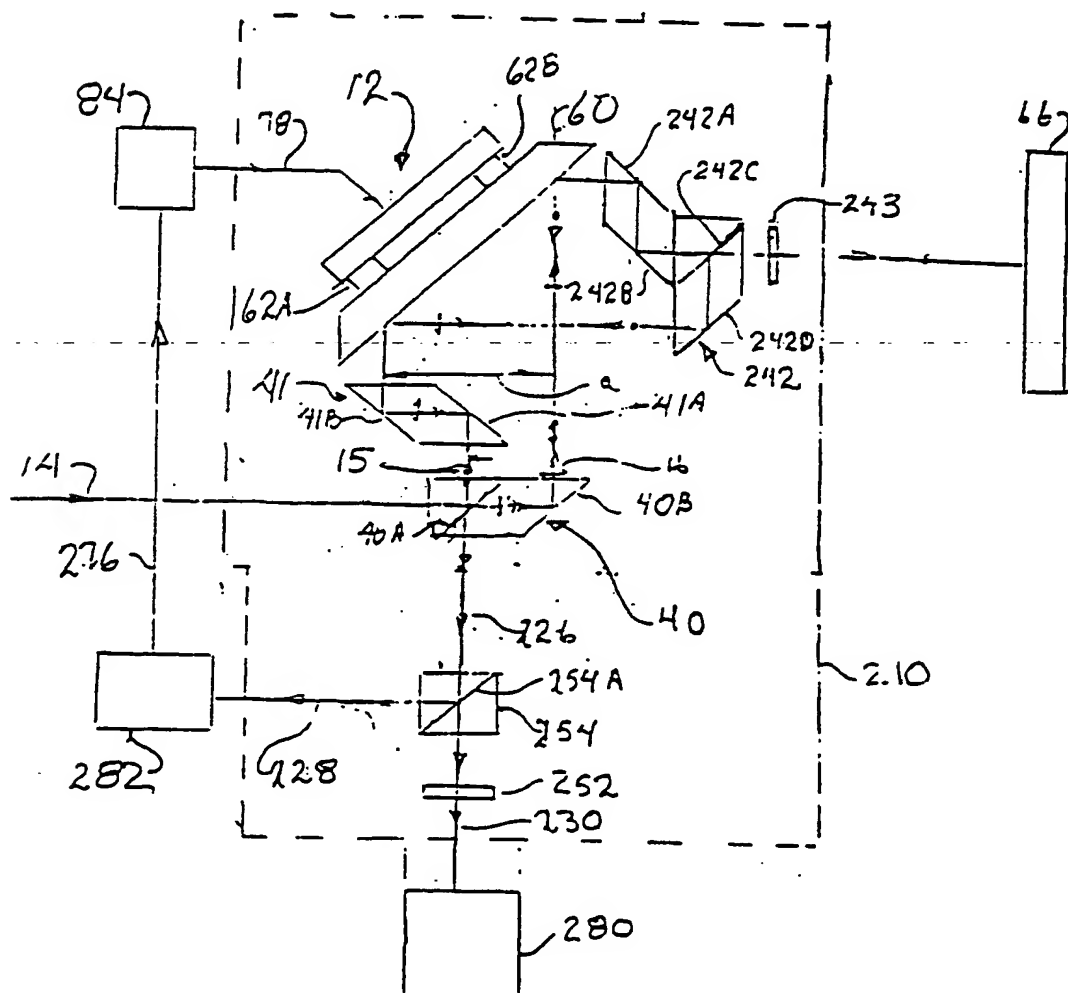

FIG 3

Detailed description of Figure 6: This figure displays ten individual DNA micrograms, each labeled with a specific genotype number. The labels are arranged vertically on the left side of the image. From top to bottom, they are: 12800-0, 725-5, 725-6, 725-7, 725-8, 725-9, 725-10, 725-11, 725-12, and 725-13. Each microgram shows a unique set of horizontal bands, which represent different alleles or genetic markers. The patterns of bands vary significantly between the different samples, indicating genetic diversity.
